Overland

\$795

Model 85-4 f. o. b. Toledo

Think of It—112 Inch Wheelbase!

It has the famous Overland 35 horsepower motor—
Now at the height of its development—
More than a quarter of a million in use—
Driving more automobiles than any other
motor of its power ever designed.
And never before has anyone anywhere ever
built so big, fine and comfortable a car
to sell for anywhere near so low a price.

The wheelbase is 112 inches.

It has cantilever springs and four inch tires.
And the price is \$795.

See us at once—they are selling faster than
we can get them.

Model 85-6, six cylinder 35-40 horsepower,
116-inch wheelbase—\$925.

PROGRESS REPORTED AT THE JEROME VERDE

Completion of the 500 Foot
Level Station Expected
Momentarily at Mine.

JEROME, Oct. 14.—Another week will see the completion of the 500-foot station in the Jerome Verde shaft, where all the pumps are to be placed. A sump is now being cut there and the necessary concrete work done. At the same time the timbers in the shaft above are being repaired. It was necessary to hurry operations while the shaft was being enlarged through the heavy ground just above the 500 and as a result some light repairs have to be made now.

When the pumps are installed on the 500 the work of enlarging the shaft from one to three compartments down to its bottom, 715 feet from the collar, will be resumed. To unwater and enlarge the shaft will take some time and the superintendent does not care to estimate just how long. There are extensive workings on the 700, all filled with water.

SMELTER IS ENLARGED.

HUMBOLDT, Oct. 14.—The third furnace at the Consolidated Arizona Smelting company's plant here has been blown in and will increase the capacity of the smelter 100 tons a day. Most of the additional ore to be treated here will come from the United Verde Extension mine at Jerome.

SUNNYSIDE TAKEN OVER BY THE UNITED EASTERN INTERESTS

Property at Oatman Is Now
Under Control of Mudd,
Jackling, Keith and Men
Who Are Big Factor in Field

OATMAN, Oct. 14.—At a meeting yesterday the stockholders ratified the recent sale of control of the Sunnyside mining property to the millionaires who own control of the United Eastern. By the terms of the deal the treasury is enriched to the extent of \$56,500 in cash which will be used to develop the properties upon the same general lines that made the Eastern one of the greatest gold mines in the world. The purchasers are Seeley W. Mudd, Colonel D. C. Jackling, F. A. Keith, Philip Wiseman and C. H. Palmer, Jr. The former management was composed of S. S. Jones, P. L. Mullen, W. H. Flanagan and L. C. Monks.

This deal brings into the limelight the Telluride and Mohave-Wonder groups on the north and south respectively. The former is the main Long and Meier property and with good showings on the upper levels in continuing to sink to the 600. The latter is controlled by Arthur Weber, formerly of Goldfield and Cripple Creek, and associates. The main vein system of

the camp traverses the three groups. Ore of exceeding richness fills the eighty-foot winze of the Gold Dust Mines Company. It averages two ounces of gold a ton at present. It was followed in the drift for some time before the winze was started. The shaft is down 200 feet and in a length of 700 feet the drift gains a further depth in rising ground of 200 feet, more, making a total depth of 400 feet. Henceforth the company can pay its expenses from the output, and pile up a handsome profit, it having an equipped mill on the ground.

Somewhat similar are results from the present week's operations in the Boundary Cone. On the hanging wall at 270 feet east of the shaft at the 750 foot level it has opened the best ore yet found in the mine. In this camp as a rule the better values are on the foot wall and with crosscuts here driven to the foot, as occurs at the 550 in the same shoot enough better values should be found to place the Boundary Cone in a class with the United Eastern, Tom Reed, Big Jim, Gold Road and Pioneer mines. It is drifting in ore in three places, one at the 550 and two at the 750. During the past week it employed a second shift, making a total of eighteen miners.

Of direct benefit to the Lexington Arizona are both these finds. Both veins pass into the Lexington ground and converge there into a main lode which recently yielded a big strike of milling ore at the shallow depth of 110 feet.

On their westward trend the same veins pass through the Paramount, Pioneer, Arizona-Tom Reed and Goldconda. On three levels drifted for hundreds of feet the Pioneer has shown up ore in sight worth over \$1,000,000. Superintendent George F. Moser is about to start two west crosscuts from the 300 and 400 drifts north close to the Arizona-Tom Reed line, to tap the Snowball vein. With their completion he will start another on the 400 south drift. The Snowball vein is the original discovery of the present day Oatman. In the early 90s a negro and white man sank an incline shaft on it for ninety feet and got averages from \$14 to \$29 a ton. The former was known as "Mr. Snowball." Snowball Miners Union of Oatman and Gold Road is named in his honor.

Fred Schader continues to get improved values from his lease on the Lila vein of the Arizona-Tom Reed. Assays cross the vein average from \$7 to \$8 and panning go better than \$40 a ton.

TO REVIVE OLD MINE.

KIRKLAND, Ariz., Oct. 14.—The old Stein mine, one of the famous producers of this section is to be revived by a new organization, backed by Phoenix and Prescott capital. A good grade of copper ore and gold values running as high as \$6 a ton were taken out by the former management, which opened up several shafts on the property.

SULPHIDE IN NEW MINE.

MIAMI, Ariz., Oct. 14.—A body of sulphide ore, said to be 400 feet wide has been struck in Tunnel No. 7 at the Copper Springs mine, four miles from here. Samples of high grade sulphide ore taken from the tunnel are being exhibited here. Surface indications, it is said, are good for the uncovering of one of the largest ore bodies in the southwest.

MACHINERY FOR THE DUNDEE NOW READY FOR MINE PLACING

Shipment Arrives at Property
and Will Be Installed As
Soon as Possible—All Con-
crete Foundations Finished.

JEROME, Oct. 14.—Machinery ordered by the Dundee-Arizona company has arrived at the mine, which is located on the south side of the hogback just out of Jerome. The machinery has been at Clarkdale several days. It would have been hauled up early in the week had not the Pittsburgh-Jerome company requisitioned all the available teams.

Included in the shipment are a 60-horsepower hoist, 12x10 compressor and Cameron sinking pump with a lifting capacity of 3600 gallons an hour. This machinery, it is estimated, has a capacity six times as great as is immediately necessary at the Dundee.

All the necessary concrete foundations are in for the new surface equipment and it is expected that the machinery will be in operation by the first of next month. The sinking of the shaft, which was down 450 feet when water forced a suspension of operations, will then be resumed.

SAYS BODY IS A POISON FACTORY

Urges everyone to drink glass
of hot water before
Breakfast.

Just as col, when it burns, leaves behind a certain amount of combustible material in the form of ashes, so the food and drink taken day after day leaves in the alimentary canal a certain amount of indigestible material, which if not completely eliminated from the system each day, becomes food for the millions of bacteria which infest the bowels. From this mass of left-over waste, toxins and ptomain-like poisons are formed and sucked into the blood.

When and women who can't get feeling right must begin to take inside baths. Before eating breakfast each morning drink a glass of real hot water with a teaspoonful of limestone phosphate in it to wash out of the thirty feet of bowels the previous day's accumulation of poisons and toxins and to keep the entire alimentary canal clean, pure and fresh.

Those who are subject to sick headache, colds, biliousness, constipation, others who wake up with bad taste, foul breath, backache, rheumatic stiffness, or have a sour, gassy stomach after meals, are urged to get a quarter pound of limestone phosphate from the drug store, and begin practicing internal sanitation. This will cost very little, but is sufficient to make anyone an enthusiast on the subject.

Remember inside bathing is more important than outside bathing, because the skin pores do not absorb impurities into the blood, causing poor health, while the bowels do. Just as soap and hot water cleanses, sweetens and freshens the skin, so hot water and limestone phosphate act on the stomach, liver, kidneys and bowels. (Advertisement)

Monday morning Engineer W. E. Defty who is now personally in charge of operations at the Dundee, started men to work running drifts north and south from the west crosscut. This crosscut was started west from the 70-foot point in the shaft on an underground blanket of ore that is five or six feet thick. The drifts are started from the 40-foot point in the crosscut where there is a raise connecting with the tunnel level below. The crosscut is also being continued and its face is more than 50 feet from the shaft. Crosscut and both drifts are in ore which carries six or seven percent copper. This ore is dropped down the raise and trammed out to the dump for shipment later.

STRIKE AT KEYSTONE.

KINGMAN, Oct. 14.—A big body of high grade ore has been struck on the 300 level of the Keystone mine at Mineral Park, the big vein of the mine having been cut near the station level. The crosscut has already entered seven feet of high grade ore. If the ore struck here is as rich as that found on the 100 level, it will run over \$40 in gold and silver.

Ore carrying copper, silver and gold values, and running \$500 a ton has been struck at the Toffe property at Mineral Park. The strike was made at a depth of 60 feet. Its extent is still undetermined.

SOCIETY

(Continued From Page Three)
The Y. W. C. A. held a board meeting Tuesday afternoon.

All the Y. W. C. A. girls are looking forward with interest to the Halloween party which will be given by the "Y. W." and "Y. M." Oct. 31. Stunts, side-shows and games have been planned by the committees in charge. It will be a "hard time" party and all are requested to come in clothing typifying stringent days.

MAYR'S WONDERFUL REMEDY FOR STOMACH TROUBLE

Gall Stones, Cancer and Ulcers of the Stomach and Intestines, Auto-Intoxication, Yellow Jaundice, Appendicitis and other fatal ailments result from Stomach Trouble. Thousands of Stomach Sufferers owe their complete recovery to Mayr's Wonderful Remedy. Unlike any other for Stomach Ailments. For sale by Bisbee Drug Co., Lowell Drug Co., Lowell, Arizona, and all other reliable druggists.

SHOP NOTES

(Continued From Page Three)
A black velvet bodice varies the monotony of pointing Hadesward by pointing Heavenward, and silver tulle gives the lightness needed.

Everyone economizes during the war, and the fashionable does so by limiting her bodice so a mere strip of handsome metal or sequined lace and two straps of fur.

Sleeves so tight with occasional rumors of gigots. Skirts have been full so long that one looks with admiration on the gathered sleeves some of the dresses show.

The all day dress made its appearance last month, it has an add little jacket, which covers a beautiful and dressy blouse, rather the top of the dress.

One may see any number of tunics this season and a black satin underdress is good and can be worn with any number of them.

No one could travel without being noticed in a little blue frock the Fair displayed some time ago, for no one could help seeing the vivid red about the collar, buttonholes and hem.

It has taken us some time to take black alpaca seriously—but it is now here and has a broad velvet collar.

Puffs, panniers and flounces—all

TO DARKEN HAIR APPLY SAGE TEA

A few applications of Sage
Tea and Sulphur brings
back its vigor, color
gloss and Youthfulness.

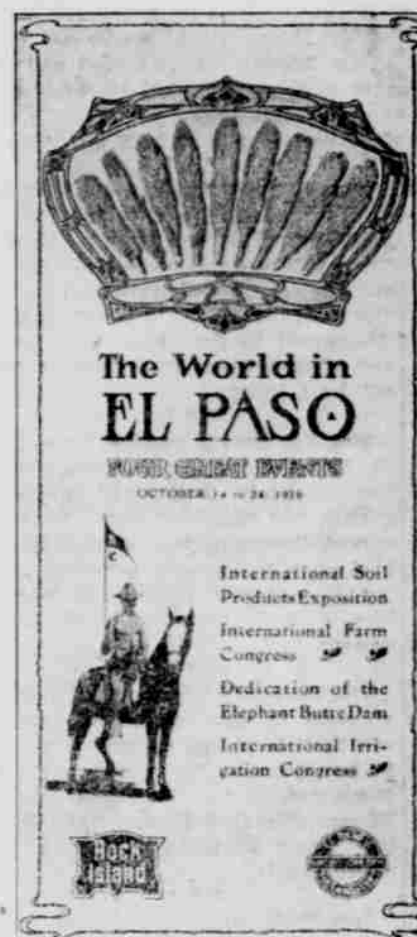

Common garden sage brewed into a heavy tea with sulphur added, will turn gray, streaked and faded hair, beautifully dark and luxuriant. Just a few applications will prove a revelation if your hair is fading, streaked or gray. Mixing the Sage Tea and Sulphur recipe at home, though, is troublesome. An easier way is to get a 50-cent bottle of Wyeth's Sage and Sulphur Compound at any drug store all ready for use. This is the old time recipe improved by the addition of other ingredients.

While wispy, gray, faded hair is not sinful, we all desire to retain our youthful appearance and attractiveness. By darkening your hair with Wyeth's Sage and Sulphur Compound, no one can tell, because it does it so naturally, so evenly. You just dampen a sponge or soft brush with it and draw this through your hair, taking one small strand at a time; by morning all gray hairs have disappeared, and, after another application or two, your hair becomes beautifully dark, glossy, soft and luxuriant.

This preparation is a delightful toilet requisite and is not intended for the cure, mitigation or prevention of disease. (Advertisement)

these one may read between the straight lines prophesied for this season.
Bouffant skirts, 1830 silhouettes, panniers where panniers never used

to be—all these and more were revealed at the openings without neglect to the slim silhouettes.
Gold and silver embroideries brighten the season outlook.

NORWALK TIRES

These popular tires have been enthusiastically welcomed by the motoring public because of their many distinctive, trouble eliminating features. The supreme quality of Norwalk Tires is wonderfully revealed when they are subjected to rigid service on the worst of roads—on treacherous mountain and desert roads and on slippery pavements when a sure, safe grip must be had. They are, without a shadow of a doubt, the MOST RELIABLE.
